

DOOR-TO-DOOR COLLECTION IN POLLENÇA

Pollença Town Council, through EMSER 2002, is introducing organic waste collection into the existing door-to-door selective waste collection service already operating in the town of Pollença.

This system helps us comply with regulations, improve waste separation at source, and move towards a cleaner, more efficient and sustainable municipality.

WHY IS IT IMPORTANT TO DO IT CORRECTLY?

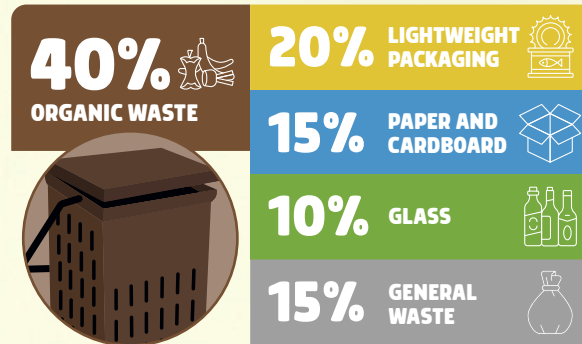

- 1 We reduce residual waste and prevent valuable materials from being incinerated.
- 2 We make better use of resources and give waste a second life.
- 3 Less waste sent to the incinerator means fewer greenhouse gas emissions.
- 4 Better separation results in lower management costs for everyone.

WHAT SHOULD YOU DO?

- ✓ Use the 10 L bin for kitchen organic waste and compostable bags.
- ✓ Separate waste correctly.
- ✓ Put it out on the designated day using the correct bin:
 - Brown bin with grey lid for organic waste and residual waste.
 - White bin for packaging, glass and cardboard.

THE IMPORTANCE OF ORGANIC WASTE

In household waste, organic matter is the largest fraction, accounting for 40% of the total weight. Therefore, separating it correctly is essential.

Separating organic waste is the first step towards reducing residual waste, saving resources and protecting our environment.

YOU MAY DEPOSIT:

- Food scraps, fruit and vegetables.
- Eggshells and nut shells.
- Coffee grounds and tea bags.
- Used napkins and kitchen paper.
- Small gardening waste (excluding pruning waste).

REMEMBER!

Use compostable bags.
